

good, than to take a new place. If you will
allow me to make any ~~fixed~~ appointments for you
next Sabbath, please write.

I'm glad to see the abo. Continued - trust it will
be. ~~the Boston~~ I shall have some more subscribers
here for ^{your} next week. Have just seen Bro. Clarke
of Rutland. He wishes you to lecture in his place.
He tells us that Mr. Lincoln of Gardiner, is sick of
the old organization.

We have just had a letter from Emily, saying
that her husband was detained by sickness & has
returned to Wren. My wife will visit us this week, &
if you are here a week from to day, you will
meet them. - Hope such a junction will be
brought about. Edward is very happy - wants me
to ask you if he can stay till next fall.

If you can bring my old boots conveniently
when you come, do so. I want them when
I work in my garden.

Yours etc.
E. S. Morse.

Rev. E. S. Moore

Sare Aug. Monday 29—

Dear Bro. Phelps

Your anti Slavery lecture here has done execution. It has furnished our thinking people with "things to think at". Our staunch whigs begin to waver. Mr. Robinson meets them at every turn with quotations from your lecture & the Abolitionist. Capt. Caldwell especially is closely pursued. Mr. R. asked him, "What do you think now about saving the country by changing second Causes, & disregarding the first?" O. I don't know, said the Capt. It's a great subject & there are difficulties on both sides. Another said to him, "Guess you'll get your house done Capt, for you'll goe to vote for Harrison". "Well" said he, perhaps I shall, but I aint quite convinced yet. One or two more such lectures wd convince him, & his conversion wd be a host. In short, the "Independent Woman" is fairly up for discussion, & I have no doubt that the ~~independent~~ Cause will receive a strong accession from this place. I write these things for your encouragement, & to request you if possible to give us one or two more lectures when you come this way next week. It is important to administer while the fever is on, & you must prescribe. The train of thought you started here needs to be ~~fully~~ followed out. A few more blows on the same spot, will do more
